

Topic: Animals including humans	Year: 2	Strand: Biology
---------------------------------	---------	-----------------

What should I already know?
<ul style="list-style-type: none"> • There are five types of vertebrates (mammals, fish, reptiles, amphibians, birds) • Vertebrates are animals that have a backbone. • Some animals are suitable to be kept as pets but others are not. • Some animals give birth to live young but others lay eggs. • Doctors and nurses give us medicine when we are poorly.

Investigate!
<ul style="list-style-type: none"> • Match animals to their offspring • Compare and contrast offspring to their parents. • Compare the heights/hand spans of people at different stages of their lives. • Order the stages in human life. • Write an instruction text about how to look after pets. • Investigate how animals are cared for in zoos and farms. • Research animal charities, such as the RSPCA, and how they keep animals safe. • Record a food diary and evaluate your diet. • Collect information about favourite foods and present it in a pictogram or bar chart. • Participate in a series of exercises and investigate how each exercise: <ul style="list-style-type: none"> • makes your body feel • affects your breathing • uses each of your muscles

What will I know by the end of the unit?
<p>What is a life cycle?</p> <ul style="list-style-type: none"> • A life cycle is the series of changes that an animal or plant passes through from the beginning of its life until its death. • Animals, including humans, have offspring which grow into adults. <div style="text-align: center;"> <p>Life Cycle of A Frog</p> </div> <div style="text-align: center;"> <p>Life cycle of a Butterfly</p> </div> <div style="text-align: center;"> </div>

Vocabulary	
backbone	the column of small linked bones down the middle of your back
balanced diet	a variety of food that you regularly eat
bar chart	a chart which uses bars to represent the value of something and comparing it to a different group <p style="text-align: center;">bar chart</p>
bones	the hard parts inside your body which form your skeleton
disease	an illness which affects people, animals, or plants
exercise	When you exercise , you move your body energetically in order to get fit and to remain healthy
